+1 469 996 5488

I am a visual artist. I have many years in the customer service field. I am a software engineer specializing in front end web development. I try my best to utilize all of these skills to provide a unique product in an efficient manner that exceeds all expectations.

Willing to relocate: Anywhere

Work Experience

Front End Web Developer

Manifest - Plano, TX

June 2009 to Present

I started my company in 2009, an online retail site. Since then, I have been doing mostly freelance design work. Most recently I have been trying to implement these design skills into web development. After learning HTML, CSS, and Javascript, the possibilities have expanded immensely. Though currently learning different frameworks, I feel I am at a level of expertise that I will surely be a valuable addition to any team as an entry level developer. I have determination and ambition to learn and a colorful thought process that can provide new and fresh insight to any project. If the job needs to be done, I will do it efficiently and creatively.
